Profile

Ambitious and results-driven software developer with a strong background in full-stack web development, proficient in both front-end and back-end technologies. Adept at working collaboratively in a team environment as well as independently. Committed to continuously enhancing skills and staying updated with the latest industry trends.

Skills

- **Programming Languages:** Python, JavaScript, C, Java
- **Frontend Technologies:** React.js, Bootstrap, Tailwind CSS, Redux Toolkit, MUI, Ant Design, React Hooks, HTML5, React Query
- **Backend Technologies:** Django, REST API, JWT, PostgreSQL, Celery, Redis, Debug Toolbar, Cache Management
- **Tools and Technologies:** Git, VSCode, GitHub, Postman
- **Cloud Services:** AWS, Cloudinary, Vercel, Render
- **Soft Skills:** Problem Solving , Team Collaboration, Quick Learning
- **Additional Skills:** Performance Optimization, Debugging,

Education

Bachelor of Arts in English Language and Literature, 2019-2022

Calicut University

Projects

Evento | Python, Django, React, Redux, REST API, Redis, Postgres, tailwind CSS, AWS, JWT

March 2024

- Evento is an event booking platform designed to cater to three distinct user roles: Admin, Vendor, and User. The platform provides a comprehensive solution for event management and ticket booking.
- [Live Project](#) | [GitHub Repository](#)

InstyTution | Python, Django, Django Channels, Websocket, WebRTC, React, Redux, REST API, Redis, Postgres, MUI, AWS, JWT, ReactQuery (Current)

September 2024

- InstyTution is an E-learning platform that offers live streaming classes where users can enroll in courses of their choice. The platform also integrates eCommerce functionality for purchasing educational materials. It is a collaborative project utilizing GitHub for version control, facilitating seamless teamwork and efficient code integration.
- Implemented relational data storage with PostgreSQL and Supabase cloud service, ensuring strong ACID compliance.
- Utilized Cloudinary for optimized media storage, handling images, PDFs, and videos efficiently.
- [Backend GitHub Repository](#) | [Frontend GitHub Repository](#)

Seminar Hall Booking

June 2024

- Created a platform for booking seminar halls with user signup/login.
- Developed with React, Redux for front-end and Django REST framework, PostgreSQL for back-end.
- [Live Project](#) | [GitHub Repository](#)

QR Code Generator

May 2024

- Developed a web application for generating QR codes from provided links or text.
- Built with React and JavaScript for efficient performance.
- [Live Project](#) | [GitHub Repository](#)

Kanban App

June 2024

- Designed and developed a task management tool with drag and drop functionality.
- Implemented using React, JavaScript, and Tailwind CSS.
- [Live Project](#) | [GitHub Repository](#)

Movie App

May 2024

- Developed a web application for listing popular movies and managing favorites. Features include movie listings, a favorites page, and adding/removing movies from favorites.
- Built with React for front-end and integrated with an external movie API.
- [Live Project](#) | [GitHub Repository](#)

Experience

Self Stack Internship

December 2023 - october
2024

- Gained hands-on experience in full-stack development, focusing on both front-end and back-end technologies.
- Enhanced skills in React.js, Django, and PostgreSQL through practical application in real-world projects.
- Collaborated with a team of developers to design, develop, and optimize web applications.
- Participated in code reviews, debugging, and testing to ensure high-quality code.
- Optimized database queries, reducing load times and improving overall efficiency.
- Implemented caching strategies using Redis to enhance application performance.
